Babolna Bioenvironmental Centre Ltd.; Approval of a Pesticide Product Registration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of an application to register the pesticide product Babolna Insect Attractant Trap, containing a new active ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. **FOR FURTHER INFORMATION CONTACT:** By mail: Sheila Moats, Regulatory Action Leader, Biopesticides and Pollution Prevention Division (7511C), Office of Pesticide Programs, Environmental

Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number, and e-mail address: Rm. 9th floor, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, 22202, (703) 308-1259, e-mail: moats.sheila@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

Electronic Availability: Electronic copies of this document and the Fact Sheet are available from the EPA home page at the **Federal Register**-Environmental Documents entry for this document under "Laws and Regulations" (<http://www.epa.gov/fedrgstr/>).

EPA issued a notice, published in the **Federal Register** of October 9, 1996 (61 FR 52942)(FRL-5395-6), which announced that Babolna Bioenvironmental Centre Ltd., 1107 Budapest X., Szallas U.6, Hungary, had submitted an application to register the pesticide product Babolna Insect Attractant Trap (EPA File Symbol 070062-R), containing the active ingredient maple lactone [2-hydroxy-3-methyl-cyclo-pent-2-en-1-one at 1.0%, an active ingredient not included in any previously registered product. The U.S. Agent for this company is c/o Landis International Inc., P.O. Box 5126, Valdosta, GA 31603-5209.

The application was approved on September 30, 1998, as Babolna Insect Attractant Trap for use as a monitoring device and as a control treatment on cockroaches (EPA Registration Number 70062-1).

The Agency has considered all required data on risks associated with the proposed use of maple lactone, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health safety determinations which show that use of maple lactone when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

More detailed information on this registration is contained in the EPA Pesticide Fact Sheet on maple lactone.

A paper copy of the fact sheet, which provides a summary description of the pesticides, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from the National Technical Information Service

(NTIS), 5285 Port Royal Road, Springfield, VA 22161.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label, the list of data references, the data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 119, CM #2, Arlington, VA 22202 (703-305-5805). Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), 401 M St., SW., Washington, DC 20460. Such requests should: (1) Identify the product name and registration number and (2) specify the data or information desired.

Authority: 7 U.S.C. 136.
